Bulletin
 of the seismological station

KØBENHAVN

$\varphi = 55^{\circ}41' N.$ $\lambda = 12^{\circ}27' E.$ $h = 13$ m.

Lithologic foundation: chalk.

No. 37. Jan.—March 1936.

Instruments:

Galitzin-Wilip seismographs:

- No. 48. Febr. 27. 10^h. Banda Sea; Δ = ca. 110°. No Galitzin records. PP_Z 23^m15^s. Following readings from M-S E: SKS 28^m48^s; SKKS 29^m47^s; S 30^m.4; PS 32^m.1; SS 38^m.2.

Seismometric readings: Notation

- P — normal first preliminary tremors, longitudinal waves.
 P+ — first wave condensational (away from the epicentre).
 P- — first wave dilatational (towards the epicentre).
 P (±a, ±b, ±c) — a, b and c are trace amplitudes in mm. of first swing on NS, EW and vertical component Galitzin records respectively. + indicates ground motion directed to N, to E or up, — indicates ground motion to S, to W or down. When a second set of amplitudes is given it refers to the second swing. If an amplitude is not measurable the number is replaced by x.
- PP... — longitudinal waves reflected at the earth's surface.
 S — normal second preliminary tremors, transverse waves.
 SS... — transverse waves reflected at the earth's surface.
 PS; PPS;... — waves reflected at the earth's surface which travel partly as longitudinal, partly as transverse waves.
 SKS — waves which traverse the mantle as transverse waves but are refracted through the core with longitudinal oscillation.
 PKS — waves which pass the mantle on one side of the core as longitudinal waves, on the other side as transverse waves and are refracted through the core with longitudinal oscillation.
 SKKS — waves which traverse the mantle as transverse waves, are refracted through the core with longitudinal vibration and are reflected on its inner boundary.
- L — long, or surface, waves; main phase.
 M — waves of greatest amplitude in the surface waves.
 i — sharply defined beginning of a phase.
 e — gradual beginning of a phase.
 Δ — arcual distance from the station to the epicentre.
 *) affixed to time of phase indicates that the beginning is in a time-mark.
 *) affixed to number and date refers to Notes.

 $\varphi = 55^\circ 41' N$. $\lambda = 12^\circ 27' E$. $h = 13$ m.

Lithologic foundation: chalk.

No. 40. Oct.—Dec. 1936.

Instruments:

Galitzin-Wilip seismographs.

Constants:
