INTRODUCTION.

Till the end of 1937, the seismic data from the observatories of the India Meteorological Department were being published annually as Part D of the Annual Summary of the India Weather Review. Since 1938, the data are being published in the present series of the Quarterly Seismological Bulletin. With the kind co-operation of the Surveyor-General of India, the Director of the Nizamiah Observatory, Hyderabad, and of the Superintendent, Colombo Observatory, it has been possible to incorporate in the bulletin, the data of their respective observatories, *viz.*, Dehra Dun, Hyderabad and Colombo. The instrumental seismological data are collected and edited at the Colaba Observatory, Bombay, and the non-instrumental voluntary observations at the Meteorological Office, Poona.

INTRODUCTION.

Till the end of 1937, the seismic data from the observatories of India Meteorological Department were being published annually as part D of the Annual Summary of the India Weather Review. Since 1938, the data are being published in the present series of the Quarterly Seismological Bulletin. With the kind co-operation of the Surveyor-General of India, the Director of the Nizamiah Observatory, Hyderabad and of the Superintendent, Colombo Observatory, it has been possible to incorporate in the bulletin the data of their respective observatories, *viz.*; Dehra Dun, Hyderabad and Colombo. The instrumental seismological data are collected and edited at the Colaba Observatory, Bombay and the non-instrumental voluntary observations at the Meteorological Office, Poona.

INTRODUCTION.

Till the end of 1937, the seismic data from the observatories of India Meteorological Department were being published annually as Part D of the Annual Summary of the India Weather Review. Since 1938, the data are being published in the present series of the Quarterly Seismological Bulletin. With the kind co-operation of the Surveyor-General of India, the Director of the Nizamiah Observatory, Hyderabad, and of the Superintendent, Colombo Observatory, it has been possible to incorporate in the bulletin, the data of their respective observatories, *viz.*, Dehra Dun, Hyderabad and Colombo. The instrumental seismological data are collected and edited at the Colaba Observatory, Bombay, and the non-instrumental voluntary observations at the Meteorological Office, Poona.

Director General of Observatories.

INTRODUCTION

Till the end of 1937, the seismic data from the observatories of the India Meteorological Department were being published annually as Part D of the Annual Summary of the India Weather Review. Since 1938, the data are being published in the present series of the Quarterly Seismological Bulletin. With the kind co-operation of the Surveyor-General of India, the Director of the Nizamiah Observatory, Hyderabad, and of the Superintendent, Colombo Observatory, it has been possible to incorporate in the bulletin, the data of their respective observatories, *viz.*, Dehra Dun, Hyderabad and Colombo. The instrumental seismological data are collected and edited at the Colaba Observatory, Bombay, and the non-instrumental voluntary observations at the Meteorological Office, Poona.
