EARTHQUAKES IN NORTHERN CALIFORNIA, NEVADA, AND OREGON

The list following this page gives the latitude and longitude of the epicenters for earthquakes which were well enough recorded to permit such a determination.

Map No. for each epicenter corresponds to a number plotted on the map which follows the list of epicenters.

Date and Origin Time are given in Greenwich Civil Time. Subtract eight (8) hours to convert to Pacific Standard Time (P.S.T.) or seven (7) hours to convert to Pacific Daylight Time (P.D.T.). This will change the date for some of the earthquakes. Pacific Daylight Time was legally in effect throughout California from April 28 to September 29, 1956.

M is the Richter Magnitude of the earthquakes as determined from the maximum trace amplitudes recorded for the shock by the standard Wood-Anderson Torsion Seismographs. In routine practice, the nomogram given by Nordquist in the "Bulletin of the Seismological Society of America", 32:164, is used for magnitude determinations.

Q indicates the excellence with which the epicenter has been located; "a" indicates excellent, "b" good, "c" fair, and "d" poor. Under Remarks will be found a short descriptive location of each epicenter, usually with reference to a point named on the map. Information on small foreshocks and aftershocks is sometimes included in the Remarks. When numerous foreshocks or aftershocks accompany a large earthquake, a separate table is generally included following the main list of local shocks, giving origin times, Richter Magnitudes, and, where significant differences in location can be determined, the geographic coordinates. The larger earthquakes of aftershock series are also included in the main list of local shocks.

Information on the intensities of shocks reported felt is also included under Remarks. Reports on felt earthquakes are chiefly those collected by the Seismological Field Survey of the United States Coast and Geodetic Survey, which publishes a more complete summary of such reports in "Abstracts of Earthquake Reports for the Pacific Coast and Western Mountain Region". This is a quarterly publication, and may be obtained from the District Officer, San Francisco District, Coast and Geodetic Survey, 121 Customhouse, San Francisco 26, California, or from the Director, U. S. Coast and Geodetic Survey, Washington 25, D.C.

Intensities are given by Roman numerals when sufficient information on the effects of the shock is available. These intensity numbers assigned by the Coast and Geodetic Survey are based on the Modified Mercalli Intensity Scale of 1931 (Harry O. Wood and Frank Neumann, "Bulletin of the Seismological Society of America", 21:277-283, 1931), the criteria of which follow in an abridged form.

Issued September 25, 1957

Price 75 Cents

MADE IN THE UNITED STATES OF AMERICA

MODIFIED MERCALLI INTENSITY SCALE OF 1931
 (Abridged)

- I. Not felt except by a very few under especially favorable circumstances.
- II. Felt only by a few persons at rest, especially on upper floors of buildings. Delicately suspended objects may swing.
- III. Felt quite noticeably indoors, especially on upper floors of buildings, but many people do not recognize it as an earthquake. Standing motor cars may rock slightly. Vibration like passing truck. Duration estimated.
- IV. During the day felt indoors by many, outdoors by few. At night some awakened. Dishes, windows, doors disturbed; walls made creaking sound. Sensation like heavy truck striking building. Standing motor cars rocked noticeably.
- V. Felt by nearly everyone; many awakened. Some dishes, windows, etc., broken; a few instances of cracked plaster; unstable objects overturned. Disturbances of trees, poles, and other tall objects sometimes noticed. Pendulum clocks may stop.
- VI. Felt by all; many frightened and run outdoors. Some heavy furniture moved; a few instances of fallen plaster or damaged chimneys. Damage slight.
- VII. Everybody runs outdoors. Damage negligible in buildings of good design and construction; slight to moderate in well-built ordinary structures; considerable in poorly built or badly designed structures; some chimneys broken. Noticed by persons driving motor cars.
- VIII. Damage slight in specially designed structures; considerable in ordinary substantial buildings with partial collapse; great in poorly built structures. Panel walls thrown out of frame structures. Fall of chimneys, factory stacks, columns, monuments, walls. Heavy furniture overturned. Sand and mud ejected in small amounts. Changes in well water. Disturbed persons driving motor cars.
- IX. Damage considerable in specially designed structures; well designed frame structures thrown out of plumb; great in substantial buildings with partial collapse. Buildings shifted off foundations. Ground cracked conspicuously. Underground pipes broken.
- X. Some well-built wooden structures destroyed; most masonry and frame structures destroyed with foundations; ground badly cracked. Rails bent. Landslides considerable from river banks and steep slopes. Shifted sand and mud. Water splashed (slopped) over banks.
- XI. Few, if any (masonry) structures remain standing. Bridges destroyed. Broad fissures in ground. Underground pipe lines completely out of service. Earth slips and land slips in soft ground. Rails bent greatly.
- XII. Damage total. Waves seen on ground surfaces. Lines of sight and level distorted. Objects thrown upward into the air.

EARTHQUAKES IN NORTHERN CALIFORNIA, NEVADA, AND OREGON

Map No.	Date 1956	Origin Time (G.C.T.)	M	Latitude North	Longitude West	Q	Remarks
1	Apr. 1	10-49-45	2.5	40° 45'	121° 40'	b	South of Burney.
2	2	08-49-35	2.8	37° 57'	122° 18'	a	Northwest of Berkeley. IV at Canyon. Also felt at El Cerrito and Berkeley (phone reports). According to the Press, this earthquake caused a leak in a gas main at College Ave. and Bancroft Way, Berkeley. Escaping gas caused a persistent fire in a nearby telephone tunnel.
3	2	14-53-47	2.9	39.0°	122.5°	d	ESE of Ukiah.
4	3	09-26-02	2.7	36° 27'	121° 14'	b	South of Hollister.
5	4	00-53-28	2.2	38° 03'	122° 20'	b	Northwest of Berkeley. Felt in Richmond (Press).
6	5	01-15-14	3.0	40.5°	121.5°	d	North of Mineral. Largest of a small swarm of Lassen Park Shocks. IV at Manzanita Lake.
7	5	04-29-13	4.4	38° 32'	122° 31'	b	12 miles northeast of Santa Rosa (near St. Helena). This shock and its aftershock at 04-29-32 were felt over an area of approximately 3000 square miles of the coastal region of north-central California. Maximum intensity VI. Slight damage reported. VI at Angwin-Sanitarium area, Calistoga, Napa, St. Helena, and Yountville. V at Bolinas, Cotati, Inverness, and Sonoma.
7	5	04-29-32	4.2	38° 32'	122° 31'	c	Aftershock. See preceding for felt reports.
7	5	04-32-29	2.5	38° 32'	122° 31'	c	Aftershock.
7	5	04-33-28	2.3	38° 32'	122° 31'	c	Aftershock.
7	5	04-33-52	2.7	38° 32'	122° 31'	c	Aftershock.
7	5	06-17-49	2.5	38° 32'	122° 31'	c	Aftershock.
1	8	06-15-31	2.4	37° 58'	121° 41'	b	Northeast of Berkeley.
8	8	06-47-14	3.8	40° 36'	124° 49'	b	West of Ferndale.
9	9	04-42-25	4.3	39° 11'	118° 07'	b	Fairview Peak, Nevada, at 45.55.55
10	10	10-45-53	1.5	37° 50'	121° 55'	c	Foreshock of 14-09-20.
10	10	10-52-39	2.9	37° 50'	121° 55'	a	Foreshock of 14-09-20.
10	10	11-09-15	1.6	37° 50'	121° 55'	c	Foreshock of 14-09-20.

Map No.	Date 1956	Origin Time (G.C.T.)	M	Latitude North	Longitude West	Q	Remarks
10	Apr. 10	11-20-54	1.8	37° 50'	121° 55'	c	Foreshock of 14-09-20.
11	10	11-24-21	2.9	36° 26'	121° 29'	c	Southeast of Monterey.
10	10	13-07-52	2.4	37° 50'	121° 53'	c	Foreshock.
10	10	13-51-05	1.9	37° 50'	121° 53'	c	Foreshock.
10	10	14-05-08	1.2	37° 50'	121° 53'	c	Foreshock.
10	10	14-09-20	3.2	37° 50'	121° 53'	a	12 miles northwest of Livermore. Felt in Walnut Creek and Berkeley.
10	10	14-29-56	1.2	37.8°	121.9°	d	Aftershock.
10	10	16-25-14	1.7	37° 50'	121° 53'	c	Aftershock.
10	10	17-44-41	2.4	37° 50'	121° 53'	c	Aftershock.
10	10	17-52-52	1.6	37° 50'	121° 53'	c	Aftershock.
12	10	20-53-21	2.9	36.3°	121.0°	d	Northeast of King City.
13	11	13-12-17	3.3	38° 28'	122° 29'	a	East of Santa Rosa. IV in St. Helena-Angwin area.
13	11	13-14-45	2.8	38° 28'	122° 29'	b	Aftershock.
13	11	13-15-05	3.1	38° 28'	122° 29'	b	Aftershock.
14	12	15-43-56	1.9	37° 09'	122° 13'	c	Northwest of Santa Cruz. Blast?
15	13	03-19-03	3.9	41.6°	126.2°	d	Off coast of Humboldt County.
16	14	19-01-51	3.2	41° 05'	123° 21'	c	Northeast of Arcata.
17	16	05-27-06	2.0	37° 17'	121° 33'	a	Southeast of Mt. Hamilton.
6	19	05-45-05	2.9	40.5°	121.5°	d	Northeast of Mineral.
18	19	06-58-57	1.8	37° 13'	121° 47'	c	Southwest of Mt. Hamilton.
19	19	14-03-42	2.0	37° 13'	121° 39'	c	Southwest of Mt. Hamilton.
14	19	19-13-12	1.9	37° 09'	122° 14'	b	Northwest of Santa Cruz. Blast?
20	20	20-26-51	3.2	40.4°	123.0°	d	South of Weaverville.
21	23	15-03-00	3.0	39.5°	118.0°	d	Fairview Peak, Nevada, aftershock.
22	25	01-46-22	2.2	36.7°	121.5°	d	Southwest of Hollister.

Map No.	Date 1956	Origin Time (G.C.T.)	M	Latitude North	Longitude West	Q	Remarks
23	Apr. 25	13-17-51	1.8	37° 53'	122° 02'	b	East of Berkeley.

LASSEN PEAK EARTHQUAKE SWARM, MAY, 1956

The earthquake of May 15, 1956 at 18-36-48 G.C.T. was the largest of a minor swarm of earthquakes centered near Lassen Peak. By the end of May 25, the activity had again subsided to the normal level for the area.

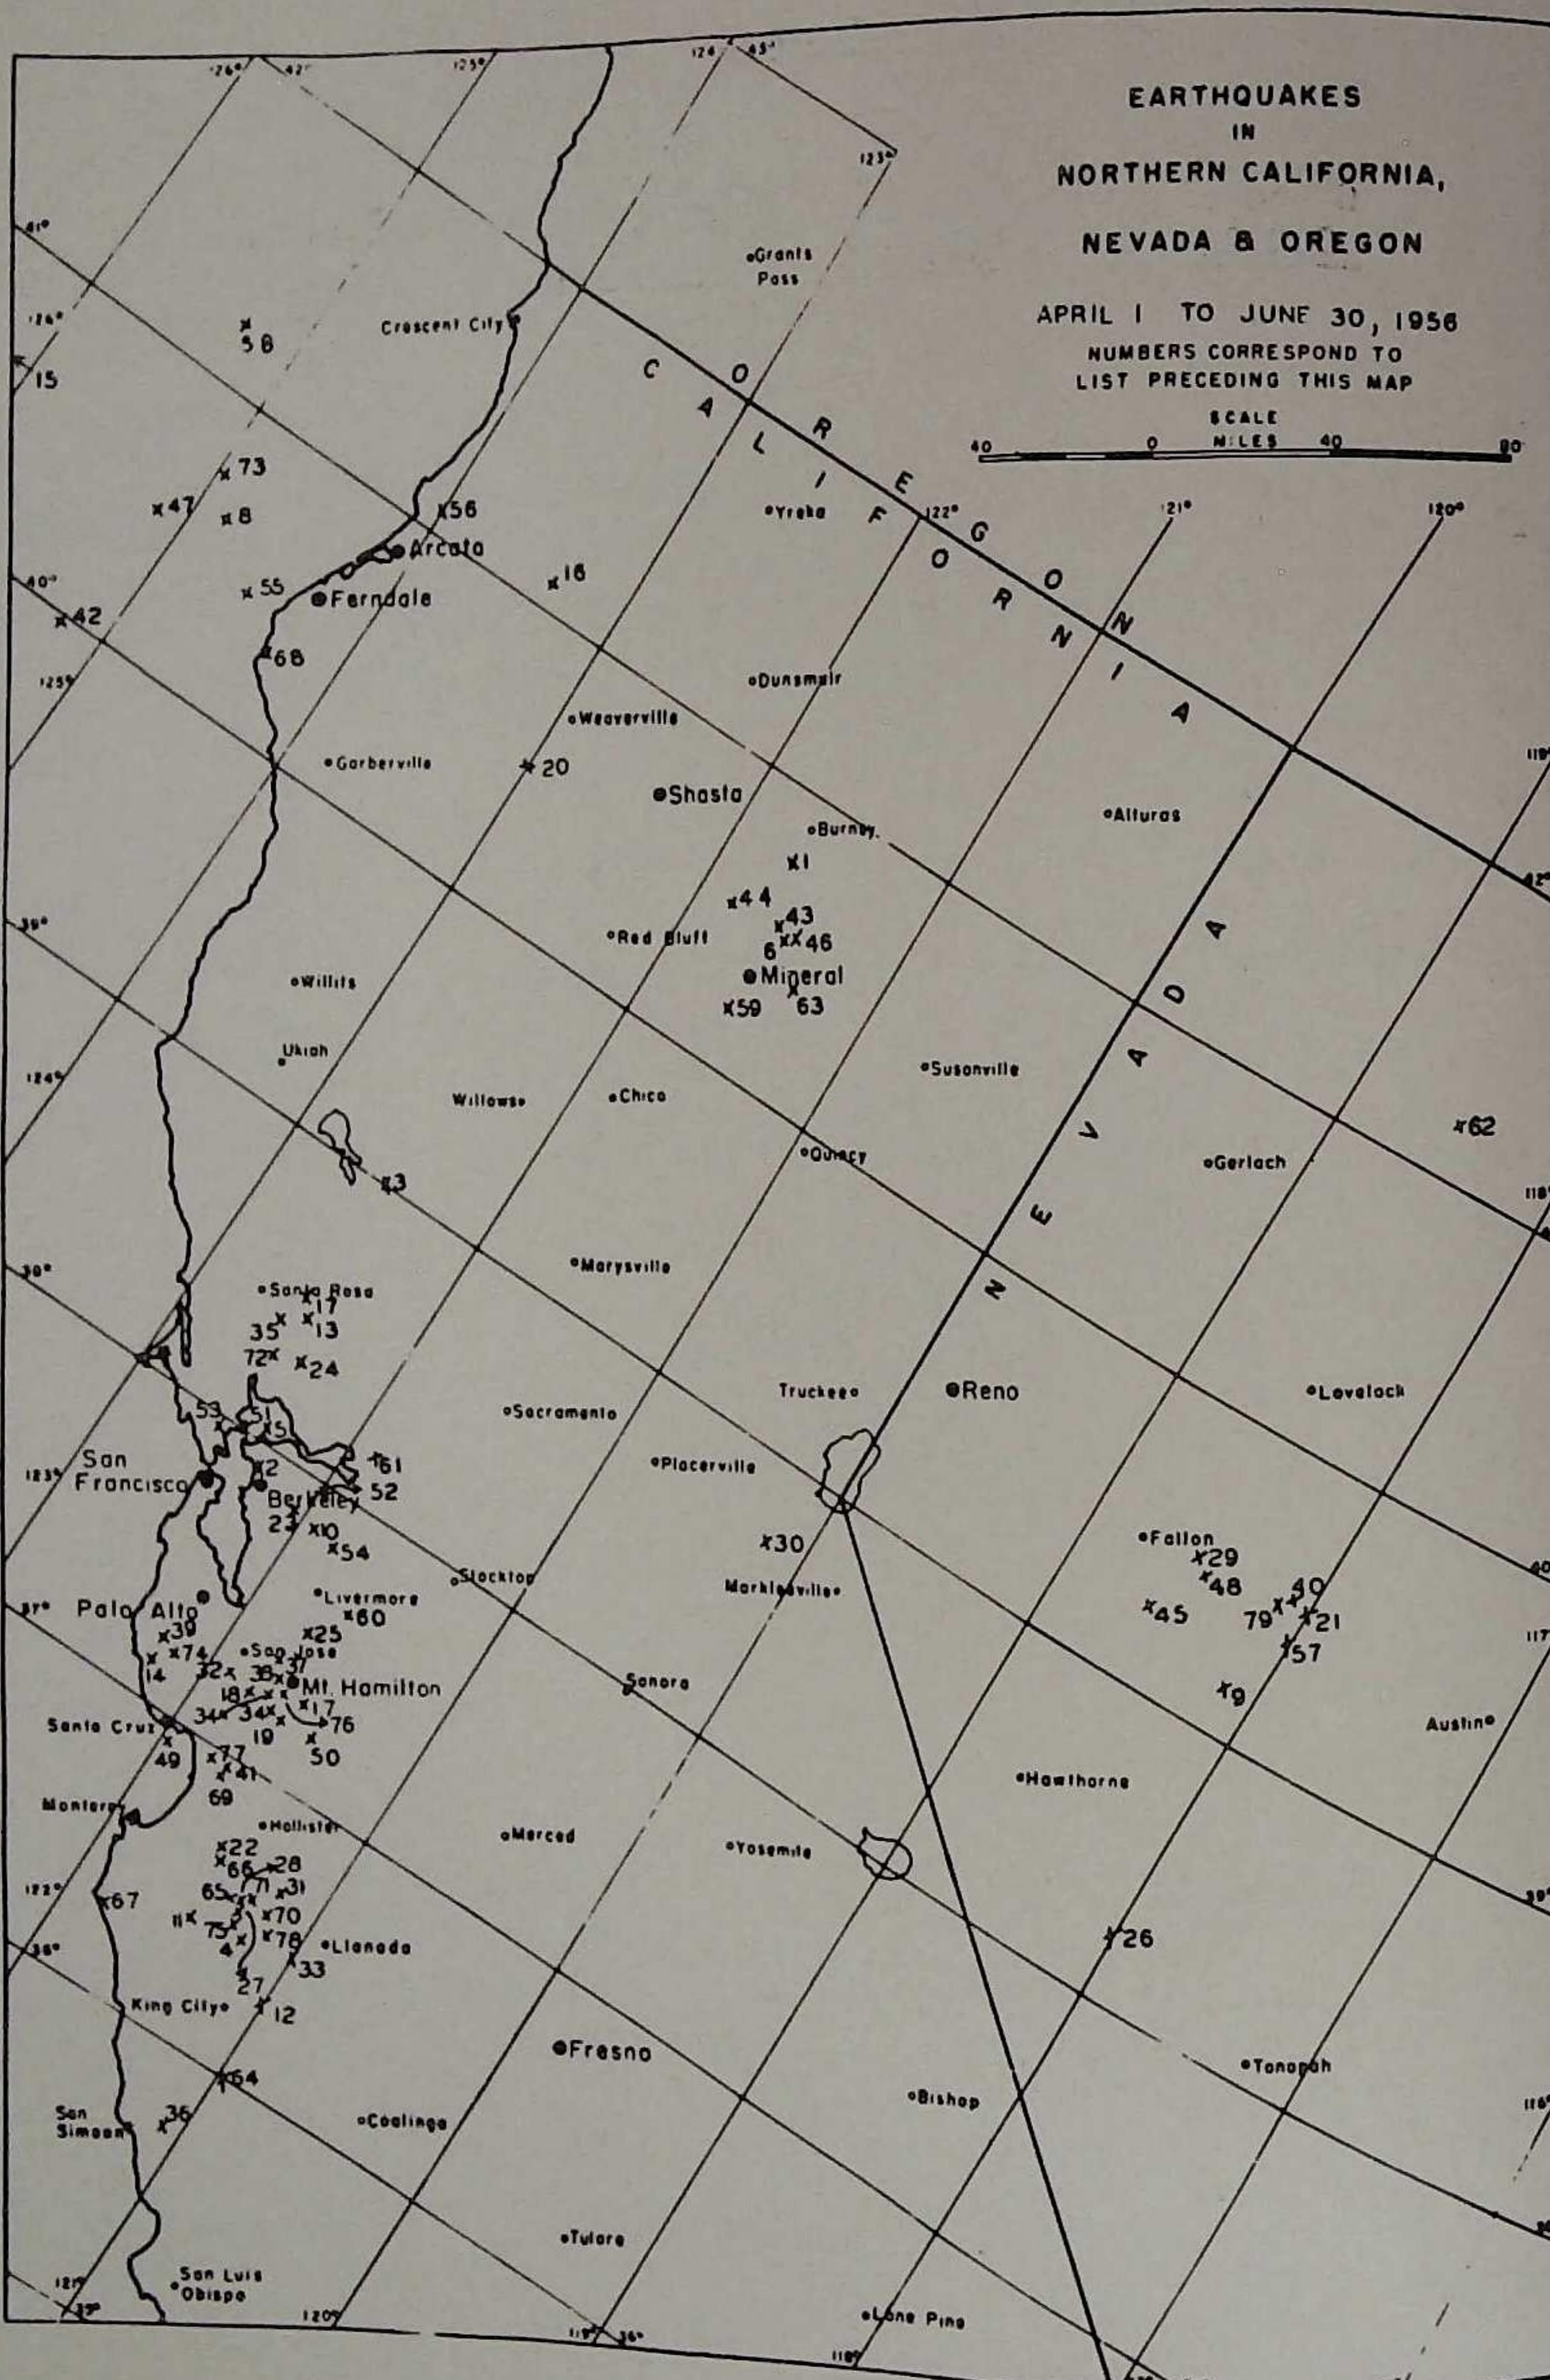

Table I below lists the dates, origin times, and Richter magnitudes of the larger shocks of the swarm. Table II gives a count, by six-hour periods, of earthquakes large enough to register on the north-south Wood-Anderson seismograph at Mineral with an amplitude of at least one millimeter. Mineral is about 30 kilometers from the epicenter of the main shock, so that the smallest shocks counted in Table II are of Richter magnitude of approximately $1\frac{1}{2}$.

Table I

Date 1956	Origin Time (G.C.T.)	Magnitude	Remarks

THE REGISTRATION OF EARTHQUAKES

at

BERKELEY, MOUNT HAMILTON, PALO ALTO, SAN FRANCISCO, FERNDALE,
FRESNO, MINERAL, ARCATA, RENO, CORVALLIS, AND SHASTA

All large regional shocks and all distant earthquakes are tabulated on the following pages. Earthquakes in the Northern California, Nevada and Oregon region are included only if of magnitude 4.5 or greater, or if of special interest. Times of distant shocks are not normally included for Palo Alto, San Francisco, or Ferndale except in cases of defective records at Mount Hamilton, Berkeley, or Arcata, respectively. Communications regarding readings of seismograms should be addressed to Seismographic Station, University of California, Berkeley 4, California.

<u>Station</u>	<u>North Latitude</u>	<u>West Longitude</u>	<u>Altitude Meters</u>	<u>Feet</u>	<u>Station Symbol</u>	Present Auspices and Date
Berkeley	37° 52.3'	122° 15.6'	81	266	B, BG [#]	University of California - 1887

Shasta	40° 41.7'	122° 23.3'	312.4	1025	SH	Bureau of Reclamation - 1942

*B denotes readings of short period instruments, BG of long period instruments (12 sec. Galitzin-Wilip).

STATION EQUIPMENT

Berkeley:

2 - Horizontal-component Wood-Anderson torsion.
 1 - Short-period vertical-component Benioff.
 3 - Long-period Galitzin-Wilip.
 2 - Horizontal-component 100 kg. Bosch-Omori.

Mt. Hamilton:

2 - Horizontal-component Wood-Anderson torsion.
 1 - Short-period vertical-component Benioff.

Palo Alto:

2 - Horizontal-component Wood-Anderson torsion.
 1 - Short-period vertical-component Benioff.

San Francisco:

2 - Horizontal-component Wood-Anderson torsion.
 1 - Short-period vertical-component Sprengnether.

Ferndale:

2 - Horizontal-component 25 kg. Bosch-Omori.

Fresno:

3 - Components short-period Sprengnether.

Mineral:

2 - Horizontal-component Wood-Anderson torsion.
 1 - Short-period vertical-component Benioff.

Arcata:

2 - Horizontal-component Wood-Anderson torsion.

Reno:

3 - Components short-period Sprengnether.

Corvallis:

2 - Components short-period Slichter.
 1 - Vertical-component Wilson-Lamison.

Shasta:

3 - Components short-period Benioff.

For all stations, the three components are indicated by N, E, Z in the "phase" column. When no letter appears, the phase is read from the vertical component only. "i" (impetus) preceding a phase designates sudden beginning of the motion; "e" (emersio) designates gradual beginning.

In the column headed "Ground Motion", "c" or "d" indicates compression or dilatation of the ground as indicated by the vertical component instrument. N, S, E or W indicates that ground motion was north, south, east, or west, respectively.

Maximum amplitude of earth displacement in microns (A) and period in seconds (T) of the indicated phases are given for the Berkeley station in the column headed "Time (GCT)". Combined horizontal amplitude of N and E components are designated by H_h.
